At Awali are the offices and the homes of the European employees of BAPCO, while outside the fence is the Arab camp for the few Bahrainis who prefer to live there rather than in their own towns and villages. Near Awali's eastern gate is the Training School for Bahrainis, where something is done to equip them for higher posts in the company. This is a field of activity which the company is beginning to develop and it is very important that is should succeed.

South of Awali, in the desert around the Jebal ad-Dukhan, is the oil field, the *raison d'etre* of BAPCO, an unimpressive area with many little squares of cement decorated with taps and valves and surrounded by low fences, which are the oil wells, while here and there derricks mark the search for more oil which is always in progress.

After the Abadan Refinery the one on Bahrain is the largest in the Middle East and supplies large quantities of refined products to India, Pakistan, East Africa and other countries "East of Suez." During the day it would be difficult to describe the refinery as anything but a large and ugly mass of iron and steel, with the great Cat. Cracker rising above the squat silver tanks. The air is hot and dusty and in the summer the iron-work is so hot that to touch it raises blisters ; but in the evening the refinery takes on the appearance of a slightly shapeless but nevertheless well decorated Christmas Tree, covered in lights and set against a background of flares of burning gas which illuminate the sky like a lurid orange back-cloth.

The Sitra anchorage has at all times an appearance of feverish activity, it is being improved so that it will be possible to load ships and tankers round the clock. In order to do this the jetty is being floodlit with great arc lamps.

On low-lying Sitra Island all that can be seen from the sea are the storage tanks, it is only on approaching nearer that the island itself becomes visible. The Tank Farm spreads across the middle of Sitra, and as it expands it threatens to cut the island in two. To the south of the Tank Farm is a large group of buildings from which a crashing sound is continually heard ; this is the Drum Plant. Further evidence of this is present in the thousands of newly painted drums that are piled in huge rows near the plant.

The oil industry is directed from the main office in Awali, where from air-conditioned coolness in the summer and air-conditioned warmth in the winter instructions go out to all parts of Bahrain where BAPCO has its installations. Bahrain is well situated for an oil industry. The oil wells are about eight miles from the Refinery, which itself is scarcely more than half that distance from the Pier and Tank Farm, while from Awali it is possible to see on a clear day both the Refinery and the Field. The radio-telephone and the aeroplane used in other Middle Eastern fields have no place in Bahrain where phones and cars are quite sufficent.

Of the 7,749 workers employed by BAPCO at the end of 1951, 4,937 were Bahrainis and 1,035 were British, American and other
